## PROFILE SUMMARY

Computer Engineering undergraduate with hands-on experience in web development, cloud infrastructure, and software development. Interested in building web applications, integrating APIs, developing backend systems, and working with cloud technologies. Active open-source contributor and technical researcher with a strong academic record and an interest in AI/ML and web and cloud technologies.

## EDUCATION

Marathwada Mitra Mandal College of Engineering

Pune, Maharashtra

**B.Tech in Computer Engineering**

2025– 2029

- Secured 9.25 CGPA

## SKILLS

**Programming:** C++, Python, JavaScript

**Web Development:** HTML, CSS

**Cloud & Devops:** Microsoft Azure, Bash, Docker, Linux

**Tools:** Git, GitHub

## PROJECTS

**Infratech- Cloud infrastructure management platform** | [GitHub](#)

July'26– Present

- Developed a cloud infrastructure management platform using Django, Azure, and MySQL to simplify cloud resource administration.
- Integrated Azure SDK/APIs to manage Virtual Machines, including start, stop, restart, and real-time status monitoring.
- Applied DevOps practices including Git-based version control, Docker containerization, and cloud automation throughout development.

**WeebWorld** | [GitHub](#) | [Demo](#)

Aug'25– Present

- Developed a responsive anime discovery web application with a modern, user-friendly interface.
- Integrated anime APIs to fetch and display dynamic content with search and filtering functionality.
- Optimized UI responsiveness and user experience using HTML, CSS, and JavaScript.

## ACTIVITIES & CONTRIBUTIONS

- **Open Source Contributor** - Contributed in open-source project through ECSoc 2026 and successfully merged multiple PRs.
- **Technical Researcher** - Working as a researcher in the college magazine. [[PRISM | A Technical Magazine](#)].
- **Participant** - Participated in WEBSCAPE organized by Mindspark'25 at COEP Technological University, Pune.
